

MY VISION FOR AMERICA

My fellow citizens, I believe that America is currently facing the greatest challenges to its sovereignty, freedoms and maybe to its very existence. These challenges are not just coming from the enemies outside the country, but from those enemies within our country as well. The American people are growing weary of our elected officials who give long speeches without ever saying anything, who put forth their views based on the results of public opinion polls, who put their personal interests ahead of the good of the country, and who are slowly eroding away our Freedoms and Sovereignty through the passage of bad legislation.

Every time the American people have been allowed to speak directly to the issues through voter referendums, the mainstream and conservative American views always win. An overwhelming number of Americans want secure borders, controlled immigration, honest elections, a strong national defense, English as our official language and integrity and accountability from our government officials, but it seems that no matter who the people elect, these goals remain elusive and the majority of Americans now feel that the country is heading in the wrong direction.

Its time for all good American citizens to "Take America Back" from the flood of illegal aliens (estimated at anywhere from 12 to 20 million) in our country who are taking jobs away from American citizens and keeping wages low. The illegal aliens cost us hundreds of billions of dollars a year in welfare, medical services, criminal justice and other costs, but very few of our elected officials seem willing to address the problem of securing our borders. On the contrary, many elected officials seem to be falling over each other in order to reward these law breakers with amnesty and a short path to American citizenship. The question most Americans ask is why are these elected officials not acting in the best interests of the country?

Although you would never know it from the media reports in this country, the United States of America and all Western democracies are currently in a war for their survival. If we weren't fighting the Radical Islamic Terrorists in Iraq and Afghanistan, we would surely be fighting them here on the streets of the USA. We must stand up and fight to protect our freedoms and way of life. Once we recognize that we need to fight Radical Islam, we must then be prepared take the battle to the enemy and its allies, both at home and abroad. We have as great a responsibility to win our struggle against Radical Islamic aggression as our parents and grandparents had to win World War II.

I believe that the time has come for Americans to “Take America Back” from the liberal politicians, activist judges and anti-American socialist organizations within our own country, that are trying to take any reference to God out of our schools and government, and replace him with sex education where our children are told that everything is OK as long as its safe. They tell us it’s OK to celebrate some special religious or ethnic holidays in our schools in the name of diversity, but they do not allow us to celebrate any Christian or Jewish holidays in schools or we risk a lawsuit.

There are, however, some brave elected officials and new citizen candidates out there from a wide variety of political parties, both large and small, who are coming forward and standing up to protect this country from the liberal agenda that is destroying this country from within, a little piece at a time. These Americans citizens are part of a new American Movement in this country. They are people of good moral character, who put God, country and family above all else. They are the men and women who know right from wrong and who believe that hard work is necessary to succeed in a free society. They are people who are willing to stand up for what they truly believe and do not base their opinions on what they believe other people want to hear, but rather on what is in their heart and what is good for the country.

America is the greatest country in the world, but it is not the government that makes this country great, it is the people. It is my belief that the United States Constitution and the Bill Of Rights are the most powerful words ever written. Thousands of Patriots have, and will continue to die for the very thing that these documents represent. Freedom! The U.S. Constitution clearly outlines how our "government of the people, by the people and for the people" should operate. We should be conducting our country's business in the manner envisioned by the founding fathers.

Americans are tired of business as usual in Washington, DC and are ready for a change. The country needs everyday citizens to step up, become involved and run for office. We need people in office who know what it’s like to work almost half the year to pay their taxes. I believe that regular working people like you and me can generate enough grassroots support to be viable candidates for political office in the USA in the 21st Century without accepting hundreds of thousands of dollars in campaign contributions from sources other than individual US citizens.

I believe that if a candidate for federal office wants to change the current system with respect to receiving large contributions from select donors, the candidate must set the example. On July 4, 1776, fifty-six brave Americans signed the Declaration of Independence in Philadelphia declaring their independence from the chains of servitude to the King of England. In keeping with this "Spirit of '76" I and some other congressional candidates, have declared our independence from the chains of special interest money, political action committees, big private donors and lobbyists. I have agreed to limit the amount of money that I will accept from individuals to \$76 (in the Spirit of '76). I have also agreed to limit the solicitation of contributions to within the geographical boundaries of the 20th Congressional District and to the internet. For more information see: www.Spirit1776.com

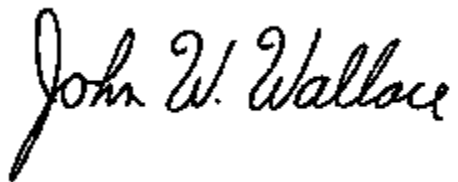

In my "Vision for America":

- **I see an America with secure borders and Controlled Immigration, not Open Borders with an unchecked invasion by illegal aliens.**
- **I see the restoration of America to "One Nation Under God."**
- **I see an America where appointed and elected officials adhere to the highest possible ethical standards, with severe punishments for violations.**
- **I see an America where the candidates themselves set the standards for Real Campaign Finance Reform with full disclosure and the elimination of contributions from all special interest groups and PACs.**
- **I see an America where the citizens' Second Amendment Rights are protected.**
- **I see an America where English is our official language.**
- **I see an America with a Strong National Defense that stays on the offensive in fighting Terrorism.**
- **I see an America where our children can read and write at grade level and be competitive in the world.**
- **I see an America without affirmative action, quotas and other discriminatory practices.**
- **I see an America with a property funded and fiscally sound Social Security System.**
- **I see an America that supports Parental Primacy where parents have rights over what their children are taught and what they do.**
- **I see an America with a more equitable and apportioned fair tax system.**
- **I see an America that supports the Right to Life of All, including the Unborn, Elderly and Infirm.**
- **I see an America with Reduced Federal Spending and a Balanced Budget.**
- **I see an America free of any treaties and agreements that endanger our sovereignty.**
- **I see an America that opposes Embryonic Stem Cell Research because it destroys unborn human life.**
- **I see an America that provides health care for the working poor.**
- **I see an America that places limitations on frivolous lawsuits and excessive jury awards.**
- **I see an America that has outlawed the attachment of "earmarks" and other "pork" to federal legislation.**
- **I see an America where judges interpret the laws, not make them.**
- **I see an America with totally honest and fair elections, with hard copy paper trails and with severe penalties for violations.**
- **I see an America free of 'Hate Crime' Legislation that gives special protection only to particular groups of people and puts our freedom of speech at risk.**
- **I see an America with a reformed Welfare System that adopts Pro-Family policies that encourages work and family unity and does not rob recipients of their dignity and independence.**
- **I see an America in which only US citizens are entitled to receive welfare, social security and other social service benefits.**
- **I see an America free of the collection of divisive race and ethnic-based data designed to divide and separate us.**

Lets “Take America Back” now in order to leave future generations the legacy of an America where they will have the freedom to make their own choices according to their abilities; where good people will triumph over evil; where people’s character will triumph over celebrity; and where work ethic will triumph over entitlements and dependency.

Let us leave the future generations of Americans a legacy of a world class education system, a clean environment, a strong national defense, limited government, unlimited opportunity and great promise for their future.

If we stand together and come forward now, we can give it to them.

A handwritten signature in black ink that reads "John W. Wallace". The signature is written in a cursive style with a large, prominent 'J' and 'W'.

John Wallace

Candidate for Congress

New York’s 20th Congressional District
